

AXCELA HP1

High-performance carbide band saw blade for extremely powerful machines such as AMADA HPSAW 310 (Hypersaw).

Advantages

- optimized design for quiet and low-vibration operation
- long blade life

Application materials – AMADA AXCELA HP1

Recommended	Suitable	Limited suitability
Construction steel, cast iron, Heat-treatable steel, stainless steel, aluminium alloys	cold-working steel, hot-working steel,	nickel alloys, titanium alloys, copper alloys

Selection of the tooth pitch – AMADA AXCELA HP1

Height	Thickness	1,4/1,6	1,8/2
67	1,6	●	●

Recommended run-in area: Machine controlled (HPSAW 310)
